

# Holistic Land Based Studies

**Gain an understanding of working in the outdoors for careers such as wildlife conservation, organic horticulture & health**

If you are thinking of a career working outdoors, then this course is ideal for you. Our study programme will equip you with the skills and self-knowledge needed in a career where **caring for people, land and wildlife** are important to you. With access to woodland, a working market garden and stunning views across the North Somerset levels, this course focuses on **practical skills development**, ensuring you are work-ready whenever you finish your studies. During the course, you will study a range of modules in **land management, conservation, horticulture, green care and health & safety**. Giving you the skills and knowledge in coppicing, tree felling, tree planting, hedge laying, woodland crafts, flora and fauna identification, organic market gardening, nature-based health care, social care and the relationship between the environment and human health and wellbeing.
